3) Public Opinion

*“coal and oil act as
‘invisible killers’ and
are responsible for 1 in
5 deaths worldwide. In
2018 alone, fossil fuels
killed 8.7 million
people globally.”*

“France, Saudi Arabia, Canada, and South Korea being among the countries that recorded the fastest decline in carbon intensity and experienced a clean energy transition by building nuclear reactors”

-MARTINA IGINI EARTH ORG 28 JANUARY 2023

Over 50 countries utilize nuclear energy in about 220 research reactors. In addition to research, these reactors are used for the production of medical and industrial isotopes, as well as for training.

-WORLD NUCLEAR ASSOCIATION 6 JANUARY 2023

EFFICIENCY

The logo of the World Nuclear Association, featuring a blue diagonal line to the left of the text "WORLD NUCLEAR ASSOCIATION". "WORLD" and "ASSOCIATION" are in black, while "NUCLEAR" is in blue.
